SERVICE WITH DEVOTION

Samatvam - Jnana Sanjeevini

by Dr Col Bhanu M Bhatt, Ms Padmaja Srinivas, Dr S Srikanta

"Asatho ma sadgamaya
tamasomā jyotir gamaya
mrityormā amritam gamaya
Oṁ śhānti śhānti śhāntiḥ"

"Lead me from Untruth to Truth
Lead me from Darkness to Light
Lead me from Death to Immortality"
- Bruhadaranyaka Upanishad.

"Service to Man is Service to God": Manava Seva Madhava Seva. Jana Seva Janardhana Seva. Nara Seva Narayana Seva.

1987: Samatvam: With this humble objective, **"Samatvam"** [referring to *Yoga or Equanimity*], began its public service activities in 1987 in New Delhi, India, with the inspiration of Padma Sri Professor Man Mohan Singh Ahuja, the Scientist - Sage and Father of Indian Endocrinology Diabetology. The service areas of Samatvam include health care, education, research and social welfare.

1993: Samatvam: Beginning 1993, enriched by a small group of Doctors – Counselors – Social Workers - and Volunteers, Samatvam Trust, crystallized as a grass roots health care institution based in Bangalore. Endocrinology - Diabetes and related disorders and Community Medicine, were the primary focus.

2003: Jnana Sanjeevini : In 2003, led by doyens of our nation like, Dr GVK Rao, Dr H Narasimhiah and Sri MA Srinivas, **Samatvam Trust** established **Jnana Sanjeevini** [referring to *Knowledge for Eternal Health*], as an "all under one roof - multispecialty" Diabetes Endocrinology Day Care Center, in its own premises in JP Nagar, Bangalore.

HIGHLIGHTS

Camp Man Mohan 2019

A Residential Health Education, Medical Care and Counseling, Recreation, Cultural Activities, Personality Development and Life Enrichment Camp for Children and Youth with Diabetes and their Families.

Samatvam – Jnana Sanjeevini

by Ms Uma Dayashankar, Dr T Kamala, Dr Kavitha Muniraj

Service with Devotion: *"Service with devotion"* is our motto. Each patient deserves the best of our knowledge, skills and most importantly humanity. Health care of highest possible quality to the highest possible quantity is the universal need.
"Let every action of mine be something beautiful for God." - Mother Teresa

"People and Team – "Jana Shakthi": People and team are our core [and perhaps only] strength. Patient is always the captain of our Team. Together everyone achieves more. Commitment to reach out to the poor and needy is permanent.
" Be the change you want to be." - Mahatma Gandhi
"Let your life be your message." - Mahatma Gandhi

Power of Prevention: *"Power of prevention"* is our slogan. Diabetes and its complications are preventable: Heart attacks, strokes, blindness, kidney failure, gangrene / leg amputations are preventable. Angioplasty and bypass surgeries are preventable, to a major extent. The answer is in your hands, ….. ….. Samatvam - Jnana Sanjeevini is there to help you.
"Arise, awake and stop not till your goal is reached." - Swami Vivekananda
"Be and Make." - Swami Vivekananda

Samatvam – Jnana Sanjeevini – Pioneering service to people and nation: During this long journey, at several steps, we have pioneered novel Diabetes patient and public health education programs, innovated Outreach rural and urban Diabetes camps and implemented Model self-help community care services, for our people and nation. All with social relevance, for human and societal good.

Through these activities, Samatvam [despite being a small grass roots organization] has earned to its credit several FIRSTS or EARLIESTS or LARGESTS, in the health care arena of our country; these include:

Structured Hospital, Clinic and Community Based Diabetes Patient Education Programs: Implementation of structured hospital, clinic and community based diabetes patient education programs;

Diabetes Educators, Counselors, Specialist Nurses, Physician Assistants, Social Workers and Podiatrists: Training of Diabetes Educators, Counselors, Specialist Nurses, Physician Assistants, Social Workers and Podiatrists;

Childhood Diabetes Clinics, Residential Diabetes Camps and Patient Parent Support Groups: Organization of Childhood Diabetes Clinics, Residential Diabetes Camps and Patient Parent Support Groups;

24 Hour FREE Diabetes Helplines: World's longest and busiest 24 hour FREE Diabetes Helpline[s]; which has [have] even catered to patients and families from far off countries [across the globe], for both general and emergency medical support.

Mass Print and Electronic Media: Successfully utilization of mass print and electronic media, to disseminate our message of Power of Prevention;

Insulin Pump and Continuous Glucose Monitoring Program: Implementation, in 2002, of the first certified Insulin Pump and Continuous Glucose Monitoring Program in India.

HEALTH CARE

DISHA

A Type I (Insulin Dependent) Diabetes Children and Youth
FREE Childhood Diabetes Clinic
FREE Insulin Lifeline: Insulin for Every Child
Insulin PLUS Education

DOSTI

Type II (Non – Insulin Dependent) Diabetes Adults
FREE Adult Diabetes Clinic
FREE Medicines - Health for Helpless

DEEPA

Diabetes Physicians - Counselors – Health Professionals
Scholarships - Observerships - Internships - Fellowships
Continuing Medical Education – Training

HEALTH EDUCATION

Continuous Glucose Monitoring

by Capt Ms Geetha Rao, Dr Reshma Harsha, Ms Madhumati S Vaishnav

What is continuous glucose monitoring?
Continuous glucose monitoring automatically tracks
blood glucose levels, also called blood sugar, throughout the day and night. You can see your glucose level anytime at a glance. You can also review how your glucose changes over a few hours or days to see trends. Seeing glucose levels in real time can help you make more informed decisions throughout the day about how to balance your food, physical activity, and medicines.

How does a continuous glucose monitor (CGM) work?
A CGM works through a tiny sensor inserted under your skin, usually on your belly or arm. The sensor measures your interstitial glucose level, which is the glucose found in the fluid between the cells. The sensor tests glucose every few minutes. A transmitter wirelessly sends the information to a monitor. The monitor may be part of an insulin pump or a separate device, which you might carry in a pocket or purse. Some CGMs send information directly to a smartphone or tablet.

Special Features of a CGM
CGMs are always on and recording glucose levels—whether you're showering, working, exercising, or sleeping. Many CGMs have special features that work with information from your glucose readings:
- An alarm can sound when your glucose level goes too low or too high.
- You can note your meals, physical activity, and medicines in a CGM device, too, alongside your glucose levels.
- You can download data to a computer or smart device to more easily see your glucose trends.

Some models can send information right away to a second person's smartphone—perhaps a parent, partner, or caregiver. For example, if a child's glucose drops dangerously low overnight, the CGM could be set to wake a parent in the next room.

Special Requirements Needed to Use a CGM
Twice a day, you may need to check the CGM itself. You'll test a drop of blood on a standard glucose meter. The glucose reading should be similar on both devices. For safety it's important to take action when a CGM alarm sounds about high or low blood glucose.

Who can use a CGM?
CGMs are approved for use by adults and children with a doctor's prescription. Some models may be used for children as young as age 2. Your doctor may recommend a CGM if you or your child:
- are on intensive insulin therapy, also called tight blood sugar control
- have hypoglycemia unawareness
- often have high or low blood glucose
Your doctor may suggest using a CGM system all the time or only for a few days to help adjust your diabetes care plan.

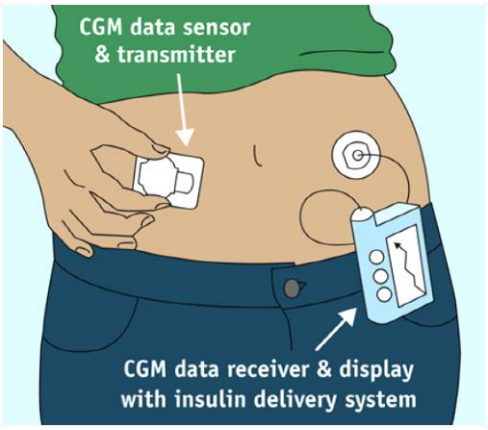

What are the benefits of a CGM?
Compared with a standard blood glucose meter, using a CGM system can help you
- better manage your glucose levels every day
- have fewer low blood glucose emergencies
- need fewer finger sticks

A graphic on the CGM screen shows whether your glucose is rising or dropping—and how quickly—so you can choose the best way to reach your target glucose level. Over time, good management of glucose greatly helps people with diabetes stay healthy and prevent complications of the disease. People who gain the largest benefit from a CGM are those who use it every day or nearly every day.

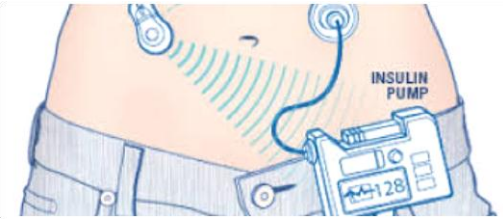

Insulin Pumps

Insulin pumps are small, computerized devices that mimic the way the human pancreas works by delivering small doses of short acting insulin continuously (basal rate). The device also is used to deliver variable amounts of insulin when a meal is eaten (bolus).

Continuous Glucose Monitoring

A tiny CGM sensor under the skin checks glucose. A transmitter sends data to a receiver. The CGM receiver may be part of an insulin pump, as shown here, or a separate device.

Artificial Pancreas

An artificial pancreas is a man-made device that is designed to release insulin in response to changing blood glucose levels in a similar way to a human pancreas.

Camp Man Mohan 2019

by Ms Varalakshmi Shivaraj, Mr M Mahesh, Dr Apoorva Govind

Diabetes: Best of Health
Venue : Sri Mutt, Sanehalli - 577515, Hosadurga Taluk, Chitradurga District, Karnataka

Date: 24th Wednesday - 29th Monday, April 2019

Under the Auspices and Blessings of his Holiness Sri Panditaradhya Shivacharya Swamiji, other Patrons, Benefactors and Well-wishers and under the supervision of Diabetes Specialist Doctors and Counsellors (Samatvam), and Teachers and Instructors (Sanehalli School).

For Children and Youth with Diabetes

Goal: A Residential Health Education, Medical Care and Counselling, Recreation, Cultural Activities, Personality Development and Life Enrichment Camp for Children and Youth with Diabetes and their Families.

Supported by (a) Expert Diabetes Physicians, Health Educators and Social Workers (Samatvam) and
(b) Teachers, Artists, Instructors and Spiritual Leaders (Sri Mutt, Sanehalli)
Registration : FREE - Preregistration Required

CME - Practical and Clinical Diabetology: (Free)
For Doctors and other Health Professionals

(26th Friday April 2019; 10:00 am to 02:00 pm)

Diabetes Awareness and Medical Camp: (Free)
For Adults, Family and General Public (28th Sunday April 2019; 10:00 am to 02:00 pm)

Samatvam: Science and Research for Human Welfare Trust

Samatvam (= equanimity) is a registered non-profit charitable public trust, envisioned and initiated by a group of medical volunteers in 1987. SAMATVAM was established to provide comprehensive health care for people with diabetes and other endocrine metabolic disorders, with care and compassion (Service with Devotion). Since its inception, a major focus of SAMATVAM'S public service activities has been providing treatment to the poor and needy from different parts of Karnataka State, neighboring states, and other parts of India.

Donations of any kind (material and might) are welcome and gratefully acknowledged (including naming your sponsorship / facility). Donations made to "SAMATVAM :Science and Research for Human Welfare Trust" qualify for exemption under the section 80G of the Income Tax Act – Govt of India. Trust PAN Number: AAATS5649B. Samatvam is registered under Foreign Contribution Regulation Act (FCRA) Registration Number: 94421055
