Diabetes Challenge

Diabetes is the biggest public health crisis of the 21st century and it continues to grow at epidemic proportions. India bears the highest burden of people with diabetes (60 million in year 2011, increasing to 100 million by year 2030) in the world. Nearly 25 -50% of the people having diabetes don't even know it. Diabetes increases the risk for a number of serious, even, life threatening complications, including heart disease, strokes, blindness, kidney failure, gangrene and leg amputations.

People with diabetes (compared with people without diabetes) are:

- 5 times more likely to suffer heart attacks (# 1 cause of death);
- 3 times more likely to suffer stroke;
- 30 times more likely to require leg amputation;
- 20 times more likely to develop kidney failure;
- 25 times more likely to develop blindness.

Diabetes shortens life span by a decade (on an average), and causes economic disability and death, in the prime of life.

Many children with diabetes in India die before they are diagnosed. Even those who are lucky enough to be diagnosed, face major social and economic hardships and discrimination (in education and employment).

However these complications are almost completely preventable.

Appeal

To make our pubic service efforts possible, we will be grateful for your guidance, leadership, support, and sponsorship. Donations of any kind (material and might) are welcome and gratefully acknowledged. Donations to **'SAMATVAM :Science and Research for Human Welfare Trust'** qualify for exemption under the Income Tax Act 80G [Govt of India].

Inspiration

"There are diseases of the body, and diseases (ignorance) of the Soul. So keep learning, working and serving."
- Dr. Paul Ehrlich

From untruth to Truth, from darkness to Light, and from death to Immortality, deliver me."
- Brhadaranyaka Upanishad

"Science without religion is lame; Religion without science is blind."
- Dr. Albert Einstein

"Science can only prolong life; Religion deepens it."
- Dr. Yellapragada Subba Row

"Let every action of mine, be something beautiful for God."
- Mother Teresa

"Be and make."
- Swami Vivekananda

Power of Prevention

Our Achievements

Jnana Sanjeevini Diabetes Hospital is a dedicated public service project of Samatvam Trust, initiated in 2003, at JP Nagar, Bangalore. The aim is to provide multidisciplinary care for diabetes and related health problems 'all under one roof'. In 2012, Samatvam completed 25 years of public service, touching the health and lives of more than 100000 fellow citizens with diabetes - adults and children, poor and rich.

Our service accomplishments include, India's First / Earliest / Structured:

- Diabetes Patient Education Program (Hospital, Clinic and Community Based)
- Diabetes Educator/Counselor
- Childhood Diabetes Clinics and Camps – Residential
- Diabetes Support Groups – Patient Parent
- Diabetes Foot Nurse / Podiatrist
- 24 hour FREE Diabetes Helpline – World's longest and busiest
- Mass Media Health Education – Eg: Live interactive TV programs
- Insulin Pump Program

Integration of Science and Spirituality in the context of healthcare is our foundation.

Community Programs

"No one will leave **Jnana Sanjeevini** uncared and unprovided, irrespective of their socioeconomic status."
